TRINITY
A BURRIS LOGISTICS COMPANY

Transportation Management Technology You Deserve

We understand that technology will make or break your supply chain.

TMS Capabilities

By choosing to add Trinity Logistics' Managed Services to your supply chain, you'll immediately gain access to our best-in-class TMS technology. A Transportation Management System (TMS) gives you more visibility into your complete supply chain, reduces costs, and improves performance.

House all of your transportation management needs, with all carriers and suppliers in one place, and gain access to a Team of logistics experts through Trinity's Managed Services.

There's no need to worry about an out-of-the-box solution that will have too many or not enough features to support your business. Our system is highly configurable.

If you're looking for SaaS (software as a service), Managed TMS, a full Integrated Outsource, or something in between, we'll do a deep dive into your supply chain and work with you to design a solution unique to your business need.

- Order Entry
- Tracking/Notifications
- Reporting
- Load Planning
- Documents
- Claims Management
- Freight Audit & Payment
- System Integration
- Rating/Tendering/Routing Guide

SaaS + TMS = Offload day-to-day workload

Managed TMS = Tactical tasks absorbed by our team

Integrated Outsource TMS = Technology consultants
