

# PRODUCE

Transporting produce requires an understanding of specialized requirements needed to arrange shipping for your product. Trinity Logistics uses multiple modes to ensure perishables and temperature sensitive product reaches its destination, on-time and as expected.

With the added experience of Burris Logistics, offering a Supply Chain visibility portal, produce inspection solution, procurement, warehousing, and e-commerce, we are confident we have the experience and expertise to satisfy any produce challenge.

## OUR SERVICE FOR YOU

### Understanding FSMA Compliance

Keeping food safe to eat is paramount. The FDA Food Safety Modernization Act (FSMA) is transforming the nation's food safety system into one that is based on the prevention of foodborne illnesses. Our job is to ensure transporting your product meets these standards.

### Carrier Selection and Vetting

Trinity Logistics works a diversified book of refrigerated carriers and has extensive produce knowledge, allowing us to maintain carrier relationships that help reduce exposure to major price spikes when produce season hits. Our vetting process ensures that only those versed in handling produce will be contracted for the shipment.

## Claims

Trinity Logistics understands PACA (Perishable Agricultural Commodities Act) requirements to ensure we minimize the need for unnecessary claims. If a problem occurs, our in-house team will negotiate produce claims on your behalf your company's unique needs.

## THE TRINITY DIFFERENCE

We offer more than just transportation arrangement. Trinity is a logistics consultant that determines action steps for supply chain improvement and can completely outsource your freight management with our Managed Services Solution.

Contact your Trinity Representative today for more information or visit [trinitylogistics.com](http://trinitylogistics.com) to discuss your company's unique needs.
